

7.3.1. Recognizing the need of the time for **Environmental protection**, the college chose environmental conservation for best practices and decided to plant and cultivate a different type of tree in the college area. The tree creates a nutritious environment for animals, birds, and humans. It improves the amount of oxygen in the atmosphere... We are continuously planting trees such as lemon, wad, jambhul, pimpal, karanj, chafa, tamarind.

Under the concept of environmental protection and conservation, students are doing environmental conservation work by planting trees in the forest department of Mauje Lambota on behalf of the National Service Plan Department.

Under Pani Aadwa Pani Jirwa to conserve rainwater at Lambota Forest Division, students are doing environmental protection work by creating a dam of soil and stones.

Pani Aadwa Pani Jirwa

In association with Maharashtra College, Nilanga Rashtriya Seva Yojana and Sadguru Foundation Kerala, **'Save Soil Mission'** was launched in the college through a lecture. Principal, Program Officer and students were present.

'Save Soil Mission'

Dr. Madhav Kolpuke, Principal of the College, Head of Sadguru Foundation while guiding under the 'Save Soil Mission'

'Save Soil Mission'

The head of Sad guru Foundation expressed his opinion that the soil carried away with rain water is the biggest problem and it needs to be stopped in time.
