

**MAHARASHTRA MAHAVIDYALAYA,
NILANGA**

Criterion III

Research, Innovations & Extension

3.4.3.1:

Number of extension and outreach Programs conducted in collaboration with industry, community, and Non- Government Organizations through NSS/ NCC etc., year wise during the last five years

Metric: 3.4.3.1

2018-23

EST. 1970

MAHARASHTRA SHIKSHAN SAMITI'S
MAHARASHTRA MAHAVIDYALAYA, NILANGA

(Arts, Commerce, Science, Information Technology & Vocational)

Re-Accredited "B+" Grade (CGPA-2.62)
NILANGA – 413521 Dist. Latur (Maharashtra State)

DR. M.N. KOLPUKE
M.Sc. Ph.D.(Zoology)
Principal

3.4.3

**Number of extension and outreach programs conducted
During Academic Year 2019-20**

Name of the Activity	Date	Venue
Work as Jal Mitra in Pani Foundation (NGO)	03/03/2020	Farms in Villages in Nilanga

A Brief Report

On 03/03/2020 Dr.G. L. Moghe received an email from Pani Foundation (NGO) Regarding working as a "Jalmitra" water friend. He went to the given place in the village and worked with other people working for the NGO to remove water scarcity in marathwada region in Maharashtra.

And on 03/03/2020 Dr. N. V. Pinamkar received an email from Pani Foundation (NGO) Regarding working as a "Jalmitra" water friend. He went to the given place in the village and worked with other people working for the NGO to remove water scarcity in marathwada region in Maharashtra

Outcomes:

1. Both Dr.G. L. Moghe Dr. N. V. Pinamkar felt great to work on the field.
2. Contributed some physical work in digging 'water cups' ditches to store water in rainy season

Dear Jalmitra,

We are writing to you to share some big news about Paani Foundation's journey ahead!

In 2016, when we began our work with the dream of making rural Maharashtra drought-free, we wondered, "Will Maharashtra's citizens make this dream theirs?"

As of 2019, this question was answered loud and clear!

Over four years, as part of the Water Cup, villagers created over 550 billion litres of water storage capacity in the state. In this people-led movement, social barriers were shattered, hundreds of villages became water abundant, and crops flourished.

However, as we continued to travel and hear from the villages, we also came face to face with a stark reality - in some places as water availability increased, so did its usage.

Farmers chose to take water-guzzling crops, so when summer approached, drought struck again due to poor water management.

This situation, coupled with the effects of climate change, gave us a clear message: No amount of water conserved will sustain us in the long run - if we don't use it judiciously.

This reality compelled us to reinvent our competition and deepen its scope.

Dr. G. L. Moghe

Dear Jalmitra,

We are writing to you to share some big news about Paani Foundation's journey ahead!

In 2016, when we began our work with the dream of making rural Maharashtra drought-free, we wondered, "Will Maharashtra's citizens make this dream theirs?"

As of 2019, this question was answered loud and clear!

Over four years, as part of the Water Cup, villagers created over 550 billion litres of water storage capacity in the state. In this people-led movement, social barriers were shattered, hundreds of villages became water abundant, and crops flourished.

However, as we continued to travel and hear from the villages, we also came face to face with a stark reality - in some places as water availability increased, so did its usage.

Farmers chose to take water-guzzling crops, so when summer approached, drought struck again due to poor water management.

This situation, coupled with the effects of climate change, gave us a clear message: No amount of water conserved will sustain us in the long run - if we don't use it judiciously.

This reality compelled us to reinvent our competition and deepen its scope.

So, after many months of R&D, we have developed a new competition! Today, we are excited to announce the **Satyamev Jayate Samruddha Gaon Spardha**.

Along with water and soil conservation, this 18-month-long competition will focus on using water wisely and restoring our natural treasures - our forests, our soil, our grasslands. [Find out more here.](#)

The road ahead is tough, but the passion and commitment of villagers has inspired us and tells us that the challenges can be met. On the basis of this passion, unity,

(Dr. N. V. Pinamkar)
