(Arts, Commerce, Science, Information Technology & Vocational)

Re-Accredited "B+" Grade (CGPA-2.62)

NILANGA - 413521 Dist. Latur (Maharashtra State)

Dr. M.N. Kolpuke
M.Sc. Ph.D.(Zoology)
Principal

Environmental conservation

7.2 Best practices

The relationship between environment and humans is unbreakable but due to various experiments done by humans to make their lives happy, the environment is being polluted and resulting in harmful effects on the living creatures. By deciding to implement it, many facilities were created in the college in that regard, along with playing an important role in environment conservation through various activities in the last five years.

Facilities available in the college for environmental conservation

1) Solar Panel

As a part of the environmental conservation initiative, solar panels have been installed in the college, thus protecting the environment by generating clean energy and also helping the environment conservation by meeting the electricity needs of the college through solar.

2) Installation of Sensor Based Lights

As a part of environmental conservation, LED and sensor bulbs have been installed appropriate places in the college thus reducing the need for electricity.

3) Conservation of water resources

As a part of environmental conservation, rain water in the ground to conserve water resources in the college. The necessary arrangements have been made in the college for this purpose.

4) Waste Management System

In terms of environmental conservation, the college has made a Waste Management Policy according to which the waste generated in the college is divided and disposed accordingly.

5) Plastic Free Campus

As a part of the environment conservation initiative, the college has banned the use of plastic so as not to pollute the soil or water.
