Water Pollution

Sl. No.	Causes of Water Pollution	Effects
1)	Soil Pollution	
2)	Covers	
3)	Pesticides	
4)	Droppers	
5)	Polluted Banks of River Beach Pollution Excessive Cleaning Chemical Fertilization Throwing waste by people Sanitation	

Soil pollution

★ Soil pollution is a part of land degradation caused by the presence of undesirable chemicals and substances in the natural soil environment.

★ It is typically caused by industrial activities, agricultural chemicals or improper disposal of water.

★ It is also known as the soil contamination.

★ The most common chemicals involved are petroleum hydrocarbons, polychlorinated biphenyls, heavy metals, and pesticides.
