In July 1992, Government of India set up the Department of Wastelands in the Ministry of Rural Development. The nomenclature of changed to Department of Land Resources in April 1999.

Watershed development in India traces its origin from River, Valley Projects (1963). The Drought prone Area Programme (1972-73) tackled specific problems drought affected areas and present development programme addressed the problems of present areas. The scheme of Watershed management in flood prone rivers commenced in (1980-81). Other programmes like water harvesting conservation programme, National watershed programme of Rain fed areas and Integrated Wastelands development programme built on the foundation of the previous programme.

The magnitude

In July 1992, Government of India set up the Department of Wastelands in the Ministry of Rural Development. The nomenclature of changed to Department of Land Resources in April 1999.

Watershed development in India traces its origin from River Valley Projects (1963). The drought prone Area Programme (1972-73) tackled specific problems drought affected areas and desert development programme addressed the problems of desert areas. The scheme of Watershed management in flood prone rivers commenced in (1980-81). Other programmes like water harvesting conservation programme, National watershed programme of rain fed areas and integrated Wastelands development programme built on the foundation of the previous programme.

The magnitude

of the work of the department is evident from the fact that is dealing with 550 sub catchments and 3237 watersheds. These arguments units lie in 6 River Resource Basins. 35 Basins & 112 catchments.

DWR has two divisions, namely watershed management division and land reforms division. Watershed Management division deals with all programmes and policies related to watersheds whereas land reforms division deals with all matters related to land record and reform policies.
