### Introduction :-

Stress is a state of reaction in the human body and is experienced by a sense of onerous tension depression and is caused by such demands of the environment or internal forces that cannot be met by intrinsic forces that cannot be met. The person stressed is anything that the person experiences or emotional behavioural or mental state level is merged both in the work and managers in the showing sign of chronic fatigue. In most cases stress leads to reduce efficiency of an employee and which in turn leads to reduce productivity stress is highly individualistic in nature. Some people have high tolerance for stress and thrive well in face of stress. Some stressors in the environment some individuals will not do well but perform well unless they are level of stress which motivate them to do on
