| 10. | Conclusion | | | |

PERFACE

It was the true and honest sense of feelings that motivated the spread out of the self help groups when the women realized that the self has helped the self. Self help groups are the kind helping hands in fulfilling their day to day needs. The realization has helped the self help groups to march forward as a movement today. This movement has developed a strong confidence amongst the women community and SHG activists of mahasishya that the self help groups are helpful to their family not only from the economic aspect but from the social status aspect as well.

The movement of women empowerment is also marching ahead in the light of this strong confidence and the sense of self-realisation. It is worth noting that women run more than 90% of the self help groups only. I strongly feel that it's the right time to take a review of this activity from social angle, as it has been 2 decades since it has started growing up.
