-: Bank :-

A Bank is a licensed financial institution that success defaults from the public by assets, liability, lending activities, etc. to be performed either directly or indirectly through capital commitment. Due to their importance in the financial stability of a country, banks are highly regulated in most countries. Most nations have institutionalized a system known as fractional reserve banking under which a bank hold liquid assets equal to only a portion of their current liabilities.

Banking in its modern sense evolved in the 14th century in the successful cities of ~~and~~ Florence & Italy. Much in many ways was a continuation of ideas & concept of credit & lending that had their roots in the ancient world. The oldest existing retail bank is Banca Monte dei Paschi di Siena while the oldest existing merchant bank is Berenberg Bank.
